Noida's aqua line was launched back in January 2019 and since then, the reception on the metro line has been great. The Aqua Line saw a 38% increase in footfall by April, which was just three months after the launch of the metro route. The Aqua Line is especially useful as it connects areas even in Greater Noida to Delhi and Gurugram. One thing that must be kept in mind is that the Aqua Line uses paper based QR code tickets rather than the plastic tokens.

The ticket should be used for entry to the station within 30 minutes of purchase
