NMRC Revolutionizes Ticketing Experience: Introduces 24-Hour Booking Window for Seamless Commuting**

NMRC has ushered in a new era of convenience for commuters with a significant enhancement in its ticketing system. Passengers can now book tickets from the comfort of their homes via the NMRC app and utilize them upon reaching the Metro Station as per their convenient time as the validity of the ticket has been increased from **half hour** to **entire business day**. Previously, commuters had to contend with a half-hour window between booking and usage, but with this innovative update, can be used at any time on that day. This step will also help in reducing crowd at stations and ticket windows.

This transformative change comes as part of NMRC's ongoing commitment to enhancing the travel experience for its passengers. By extending the validity of ticket, NMRC aims to streamline the ticketing process, offering greater flexibility and convenience to commuters. Whether planning their journey in advance or making spontaneous travel arrangements, passengers can now enjoy unparalleled ease of access to Metro tickets.
